

I Take Off My Hat: Respectful Yet Pertinent End-of-the-age Essays

In a time of increasing national turbulence and uncertainty caused by war, economic recession, and a sometimes dangerously hyper-competitive political environment, Julian C. Hartzell recognizes the need for Americans to work together, side by side, toward a shared national vision, enabled by and rooted in our history. In this collection of his letters, essays, and personal reflections, Hartzell points out potentially hazardous downfalls in American government, politics, and society and offers practical and promising ideas and pathways by which to move our nation--at least conceptually--into the future with unity. Drawing upon decisive lessons from American history and a number of religious and spiritual traditions, Hartzell identifies how the examples of past political and spiritual leaders, especially those of the Founding Era, remain profoundly relevant, meaningful, and encouraging in our hazardous situation today.
