

The Loneliest Sami

They were the loneliest of all peoples, isolated from humankind for thousands of years as their diaspora took them driving north, further and further. And yet just as they were excluded from mainstream society, so too did they exclude their own. He was the loneliest of them all, the loneliest Sami. A short story that asks questions, suggests how the past unfolded and takes us to a different future. A short story of imagination.-----

If human kind doesnt stop, then Mother Nature will stop it for you. Good work and was interesting reading especially today with all the events taking place.
