

Jonathan Franzen and the Romance of Community: Narratives of Salvation

Despite the success and significance of Jonathan Franzens fiction, his work has received little scholarly attention. Aiming to fill this conspicuous gap, Jonathan Franzen and the Romance of Community analyses each of Franzens five novels in chronological order to reveal an interior logic animating his work. Jesus Blanco Hidalgo integrates often separated formal and ideological perspectives to illuminate Franzens stylistic and narrative choices, and in so doing, he discovers the concepts, typical of romance narratives, of salvation and redemption running throughout Franzens fiction. Hidalgo shows how these salvation narratives are used for self-legitimization-not only by the characters, but by the writer himself. The author further re-assesses Franzens use of realism and explores each novel within its cultural and political context. Combining critical rigor with interpretative boldness, Hidalgo offers a solid theoretical approach to a major contemporary author.
