

## The Reconstruction of Environment. Natural Resources and Human Interrelation through Time (Proceedings of the International Congress on the Archaeology)

The Congress hosted 611 registered participants from 38 countries. Its aim was to be an international forum for scholars and demands of Near Eastern Archaeology. From the four sections of the Congress, Vol. I: 1) The Reconstruction of Environment. Natural Resources and Human Interrelation through Time, 2) Visual Communication, [Vol. II: 3) Social and Cultural Transformation: The Archaeology of Transitional Periods and Dark Ages, 4) Archaeological Field Reports (Excavations, Surveys, Conservation) ISBN 978344705757-8]. Together these volumes unite 77 contributions on about 1100 pages. They are arranged according to the sections. The first three will be introduced by the key lectures which were given by Tony Wilkinson, Winfried Orthmann, and Roger Matthews. The resumes of these sections were provided by Wendy Matthews, Dominik Bonatz, and Diederik J.W. Meijer. The contributions cover many aspects of the main themes through time, from the Neolithic to the Hellenistic / Roman period, and offer interdisciplinary approaches to complex archaeological problems.
