

The Glisters: A Novel

Fifteen-year-old Leonard lives in the decaying coastal community of Innertown. Every year or so, a boy from Leonard's school disappears, vanishing into the wasteland of the old chemical plant. Nobody knows where these boys go or whether they are alive or dead, and without evidence to the contrary, the authorities claim they are simply runaways. The local children want to know the truth, and Leonard takes refuge in the poisoned ruins of the old chemical plant, where he renews his friendship with an itinerant ecologist known as the Moth Man and discovers a shocking truth.
